

The Webster Student Portal

COAP 3110 – Interactive Site Development
Vienna, Fall II 2002

1. Problem

In a university students and teachers need to communicate with each other (for class and private reasons). Furthermore each person needs to organize his schedule (classes, assignments, tests,....)

2. Requirements

The system has to support:

- ? Communication between students (private or for a class)
- ? Communication between lecturer and student(s) (mostly for class)
- ? Calendar for students and lecturers with automatic notification of deadlines
- ? A automatic home page for each classes with basic information
- ? + more
